

android::os::Interface

```
classDiagram
    class android_os_Interface["android::os::Interface"]
    class org_kde_necessitas_ministro_IMinistroCallback["org.kde.necessitas.ministro.IMinistroCallback"]
    org_kde_necessitas_ministro_IMinistroCallback --|> android_os_Interface
```

The diagram shows a class hierarchy. At the top is the 'android::os::Interface' class, represented by a white box with a thin grey border. It has two empty rectangular compartments below its name. Below it is the 'org.kde.necessitas.ministro.IMinistroCallback' class, represented by a grey box with a thick black border. It also has two compartments: the top one contains the class name, and the bottom one contains the method signature '+ loaderReady()'. A blue arrow with an open triangular head points from the top of the grey box to the bottom of the white box, indicating that the grey box inherits from the white box.

org.kde.necessitas.ministro.
IMinistroCallback

+ loaderReady()
